Soundcloud apk 2018

APK ToolsA simple and easy to use app to interact with SoundCloud®.You can get the official purchase links to songs on SoundCloud, which are offered by the artist.Sorry, I'm not allowed to offer more than that, SoundCloud doesn't allow any direct downloads anymore!!!!If you have any problems with the app, just email me!Just "share" your song or playlist from the SoundCloud app or your favorite browser by sharing the link from the official SoundCloud web site, choose the "SoundLoader" app and a link to the official purchase will be shown after a few seconds. For your notice, sometimes it takes a bit longer to process the request!You can find a MP3 Tag Editor (beta) via the menu. Change Album, Artist, Title, Genre and Track Number of your downloaded track. The genre list consists of the official first 80 ID3v1-Genres from 1999. You can also Play, Share and Delete the tracks from there. There is also a very simple Player integrated, which plays the streams from SoundCloud. You can also get the purchase links directly from the Player. It is still very basic and buggy, so updates will come over time. Stay tuned!! hope you enjoy "SoundLoader" as I did programming it!Future development:- Make the MP3 Tag Editor faster and more complex- Improve the player in many waysSOUNDLOADER FOR SOUNDCLLOUD IS NOT AFFILIATED WITH OR ENDORSED BY SOUNDCLLOUD.This app uses the API of SoundCloud and respects their policy.Version4.0.0Min SDKAndroid 4.0.x - Ice Cream Sandwich (SDK: 15)Update onSeptember 20, 2016Sign10DFFEF7B3CC846D2B47A39COD2FC7CDE7163E724File MD5ce8ab02e2a3c9356f9299b7ea1ca8261What's newWhat's new in 4.0.0:- Updated my whole project, moved everything to Android Studio and all libraries are up-to-date- Changed the min Android version to Ice Cream Sandwich, sorry!- Added permission request for Android 6 users- Fixed a bug, which crashed the app during starting- Fixed several other bugs- Added a check, if somone tries to hack my app :)PermissionsView Permissions SoundCloud – Music & Audio Mod AdFree APK Millions of people use SoundCloud to listen to music and audio for free. We're always listening. OK, so I bought this app A couple months ago to listen to unreleased music by some of my favorite artists. It was great for the first couple of weeks and still is now, but I have one issue with it and that's the comment section. It says this app is it for 12-year-olds and up, but in the common section there is no filter in for explicit language, and recently there has been an uprising of spam messages from girls advertising for websites that are related to pornography and are not good for kids to see. I have not gone on any of these websites and I don't plan on it either because they can get viruses, and I don't watch that crap anyways. Definitely a great app but just be careful for links in the comment section. Be very careful, clicking on any of these links in the comments can easily put viruses on your phone even if it is an Apple device. Please be careful and I cannot stress this enough. It's sad to see such an amazing app go to garbage from robot p@sTo use this app to advertise. No other issues with the app, music is easy to move around from Playlist to Playlist. Definitely recommend but parents be careful with the links for your kids and us. SoundCloud is absolutely incredible! I love to post my tunes on SoundCloud for friends and fam to listen to, and to store them too! I love to find new songs or even remixes of songs I love! It's great bc I can listen to my fave artists for free, and I don't mind the adds even! I love the dark mode built into the app, it looks great! I would personally suggest using SoundCloud to my friends and fam and others for music streaming for free or with Go or Go+. I only would like to say, it is disappointing when I post a song and am sure it is mine only, but the system says I'm copyrighting another song. I can't pay to copyright my music, let alone prove it's mine, and even if I could, I wouldn't pay to copyright my tunes bc I'm NOT POPULAR AT ALL! I only have 16 followers, most of which r prob scam bc they all look alike and say about the same thing, "get known now for free" or "share your music easily and quickly by tapping this link!" or something of the sort, which is lame bc they r FAULSE! Complete fakes! I also wanted to let you know, I can't view my all played history anymore in the app! It's sad, the button is visible, "See more listening history" but whenever I click it, it won't let me view my history, but I want to see all my history! If u could fix this annoying glitch that would be awesome! I love looking through my history and miss it! Thank you for a wonderful service! SoundCloud is great but there are a lot of glitches with playlists that need to be fixed. Trying to rearrange your songs in your own playlists is a hassle, it takes multiple tries to get the song to permanently move because it often just reverts back to where it was right after you moved it. I always have to close then reopen the open to check and make sure my songs moved to where I wanted them to. Also the icons you can upload for your playlist cover never seem to update unless you actually open up and go into the playlist. This doesn't seem to be much of an issue on the desktop but on mobile my set display cover is never what I picked, it's usually automatically always the same picture as the first song in that playlist. This gets really irritating because if I want people to check out my playlists, the first thing they see is the display image and I would rather them see the one I chose than of the picture from someone's track! Lastly, please incorporate the option to move around your playlists. I have playlists from months ago that are at the way end of my profile and would rather have some of those at the forefront of my profile when you visit it. Really hope you consider ideas to fix these problems. Otherwise great app and I'll always be a user.
