Planning a wedding, a birthday party or even a meeting are the common things we hear in our everyday life. Planning can get us results that we are looking forward to in our life. Most of the people understand the importance of planning events, but very few people understand the importance of planning their life.A very famous proverb tells us that most of the people do not fail to plan, they plan to fail. If a wedding can be a disaster without planning, how big can be a disaster our life if we do not plan on it seriously? To be the person who lives a happy and content life, it is very important to plan ahead.A planned life gives us direction. Only a dead fish goes with the flow so it is very important to plan the way you want things in your life. Having a goal in life keeps us going. Without a plan, there is always a risk of doing things that you don't want or wasting your time on futile activities.We all have dreams but only a few people can achieve what they dream of. When we give our dreams a shape that is when we try to achieve them. A plan provides us with the action plan to achieve all our goals. Keeping a control on our life is very important. If we do not take control of our lives, someone else will and we will end up in depression. A plan in our life helps us to get a hang of our life the way we want. If you truly want to get what you want, taking control of your life is certainly the best strategy.People have primary as well secondary goals. Primary goals can be broken into small goals which will make it easy to achieve them. Most of the successful people in the world have a few habits in common and one of those habits is to maintain a weekly planner. You can make your own weekly planner or even maintain it on a calendar. It will act as a reminder for all the important tasks that you need to do in the week coming ahead.Here are given weekly calendars. Choose the one you like that suits your requirement.
