Cdc vis sheet for influenza 2019

flu vaccine can prevent flu (flu.) flu is a contagious disease that spreads around the united states every year, usually between October and May. anyone can get influence, but it is more dangerous for some people. children and young children, people of 65 years of age and older women, pregnant and people with certain health conditions or a weakened immune system are at the maximum risk of influenza complications. pneumonia, bronchitis, breast infections and ear infections are examples of flu-related complications. if you have a medical condition, such as heart disease, cancer or diabetes, the influence can worsen. the influence can cause fever and chills, sore throat, muscle pain, fatigue, cough, headache, and lean or stuffed nose. Some people may have vomiting and diarrhea, although this is more common in children than in adults. Every year, thousands of people in the United States die of influence, and many others are hospitalized. the flu vaccine prevents millions of diseases and visits related to influence to the doctor every year. cdc recommends all 6 months of age and older than being vaccinated every flu season. Children from 6 months to 8 years can need 2 doses during a single season of influence. all others need only 1 dose each season of influence. it takes about 2 weeks for protection to develop after vaccination. There are many influenza viruses, and they are always changing. each year a new vaccine is made against three or four viruses that can cause disease in the next season of flu. alsothe vaccine does not correspond exactly to these viruses, it can still provide some protection. The flu vaccine does not cause the flu. The flu vaccine can be administered at the same time as other vaccines. Tell your vaccine supplier if the person receives the vaccine: He had an allergic reaction after a previous dose of flu vaccine, or has severe and threatening allergies. He has never had Guillain-Barré Syndrome (also called GBS). In some cases, your health care provider may decide to postpone the vaccination of influenza to a future visit. People with minor diseases, such as a cold, can be vaccinated. People who are moderately or severely sick should usually wait until they recover before getting the flu vaccine. Your health care provider can give you more information. Soreness, redness and swelling where the blow is given, fever, muscle pain and headache can happen after the flu vaccine. There may be a very small increased risk of Guillain-Barré Syndrome (GBS) after the inactive flu vaccine (the flu shot). Young children who get the affected influence with the pneumococcal vaccine (PCV13), and/or DTaP vaccine at the same time may be slightly more likely to have a fever-related attack. Tell your health care provider if a child who is getting flu vaccine has ever had a crisis. People sometimes misfortune after medical procedures, including vaccination. Tell your supplier if you feel dizzy or have vision changes or ringing in your ears. As with any medicine, there is a very remoteof a vaccine that causes severe allergic reaction, other serious injuries or death. An allergic reaction may occur after the vaccinated person leaves the clinic. If you see signs of a severe allergic reaction (hive, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, or weakness), call 9-1-1 and get the person to the nearest hospital. For other signs that concern you, call your health care provider. Adverse reactions should be reported to the vaccine warning system (VAERS). Your healthcare provider will usually file this report, or you can do it yourself. Visit the VAERS website on www.vaers.hhs.gov or call 1-800-822-7967. VAERS is only for reporting reactions, and VAERS staff does not give medical advice. The National Vaccine Compensation Program (VICP) is a federal program that was created to compensate people who might have been wounded by some vaccines. Visit the VICP website on www.hrsa.gov/vaccinecompensation or call 1-800-338-2382 to learn about the program and about the presentation of a complaint. There is a time limit to submit a claim for compensation. Ask your healthcare provider. Call your local or state health department. Contact Centers for Disease Control and Prevention (CDC): Call 1-800-232-4636 (1-800-CDC-INFO) or visit the CDC website on www.cdc.gov/flu Information vaccine (Interim) Influence vaccine activated 8/15/2019 42 U.S.C. § 300aa-26 Department of Health and Human Services Disease Centersand Prevention Many vaccine information is available in Spanish and other languages. See www.immunize.org/vis. Muchas hojas de información sobre vacunas están disponibles en español y en otros idiomas. Visit www.immunize.org/vis. August 2020: Vaccine and Back-to-School Preventable Diseases (PDF) December 2019: Strategies for increased vaccination coverage rates (2019) (PDF) November 2019: Communicate the benefits of seasonal flu vaccine (PDF) To view a list of information publications developed by the program, click here. LINK and VFC documentation centres The Louisiana immunization program preserves a library of updated documents for vaccination providers related to general vaccination information (making papers, Q & A sheets, etc.). LINKS (Louisiana immunization information system) and Vaccines for Children (VFC). The documents are accessible by clicking on the links below: Documents relating to the registration/participation in LINKS Documents concerning the registration/participation in Louisiana VFC Vaccine Information Statements (VIS) Vaccine Information Statements (VIS) are information sheets produced by the Centers for Disease Control and Prevention (CDC) explaining to the recipients of the vaccine, their parents or their legal representatives both the benefits and the risks of a particular vaccine. With federal law, all vaccine providers must give patients, their parents or their legal representatives the appropriate VIS before they areof each vaccine since it is covered by the Compensation Programme of the vaccine lesions. VISs prediction is a requirement of national law for childhood vaccine lesions of 1986. Visit the Immunization Action Coalition (IAC) website for the latest versions of VISs. The Thier website presents the current VISs in over 20 languages, including English. Vaccine inserts To view the current package inserts for all vaccines approved by the Food and Drug Administration (FDA) plus product approvals, please access the full list provided on the Immunization Action Coalition website - click here.
