## Elite blog academy reviews

After the legendary battle between the rebels and the (ex) Elite 10 Council, the three years have already graduated. After graduating Rindou, Eishi, Momo, Somei and Tosuke, as well as the loss of Central in the Regiment de Cuisine, opened the doors for the new generation, or as called Senzaemon Nakiri, the Generation of Prodigies, to take command of the Totsuki Academy. In chapter 264 of the manga, Megumi revealed 10, 6, 5, 4, and the 1st seat of the new training, and in the last chapter 270, revealed those who completed the list of current members of the council. 10th Seatumi Meg Tadokoro The new X seat of the Elite Council 10 is the sweet lady grown next to the port, Megumi Tadokoro. He is one of the residents of the Polar Star Dormitory with Soma, Erina and Isshiki. At the beginning of their first year in high school, Megumi was on the verge of expulsion due to his unsolved results. It turned out that the reason why he constantly got E marks was because he had no confidence in himself. After meeting Soma, she gained more self-esteem and is now a member of the Elite 10. In his unofficial match with Kojiro Shinomiya, the other Totsuki Alumni have seen his experience in managing vegetables and compares Megumi with different spirits in Japanese folklore. They gave the titles "Legumes Koro-pok-Guru (Small creatures living under pherobic leaves)", "Legumes Zariki-Warashi (Spiriti known to offer a good fortune)" andSnow fairy" to her. While Shinomiya is known as the Legumes wizard, together, are called the Legumes & Student master. Its fort in the kitchen is based on "hospitality". Just like its personality, it transmits care and comfort through its food with the eater in mind. 9. Seat: Nene Kinokuni Originally, Nene was part of the central team and was the 6th seat of the board. However, after losing the Regiment de Cuisine to the rebels, he was demolished at the 9th Seat. He lost to Soma in the first meeting of the Shokugeki group. It is the heir to the famous Kinokuni family, which is a family known in the field of Japanese cuisine. Isshiki and Nene have grown together since childhood, and after seeing Isshiki do great to the things that is having a difficult time, he developed a inferiority complex at Isshiki. Its speciality is to cook soba, Japanese spaghetti made from buckwheat flour. 8th seat: Eizan Etsuya Together with Nene, Eizan is the Central team, who lost to the rebels in the Regiment de Cuisine. Eizan was the 9th place, and was promoted to 7th place on Terunori, Tosuke and Isshiki's departure. Currently, it is the eighth seat of the council. He suffered a loss against Soma in a shokugeki that had to be rigged in his favor. It is called "alchemist" for its experience in the chemical components of flavors and the vast knowledge of taste. Because of his talent, several restaurants and food figures seek his consultations,he himself tons of income. His strategy in shokugeki is "negative" the flavors of the opponents, who burned during his game with Soma. In the Regiment de Cuisine, he lost to Takumi in a parade of beef dishes. 7. Location: Takumi Aldini Takumi is part of the rebels who won against Elite 10 during the Regiment de Cuisine. He managed to beat the famous "alchemist" Eizan Etsuya. Takumi, together with the twin brother Isami, are chefs of their family restaurant in Italy called "Trattoria Aldini". He is the self-proclaimed rival of Soma, who in coincidence shares similar feelings. Its strength in the kitchen is its vast knowledge of Italian cuisine. He is also a master in the use of a particular knife, the crescent, which has a half-moon blade and two handles on both sides. He bet his crescent in a shokugeki against Subaru, and eventually lost. However, Soma defeated Subaru in another shokugeki and earned Takumi's crescent. However, Takumi refused to accept it, and promised to claim the crescent defeating Soma one day. Despite being "rivals" with Soma, they both consider themselves as best friends. 6th seat: Alice Nakiri Initially, Alice was expelled during the Exams of Advancement where the central unbelievers were fought by members of the Elite 10. Things were reversed when the rebels won the Regiment de Cuisine and reintegrated the expelled students. Through the reform, Alice was now positioned as the Sixth Headquarters of the Council.is the blood cousin of herd and is considered his intimate friend since childhood. alic is nicknamed "Heaven feel child of molecular Gastronomy" because of its experience in molecular gastronomy, a sub-branch of food science that focuses on the chemical changes that food undergoes during cooking. because of his family ties and background in the food industry, Alice has refined his talent at a young age and became the greatest figures of his field. 5. seat: ryo kurokiba The current 5th seat of the council is the helper of Alice, ryo kurokiba. ryo in general is a man often seen as dark, lazy and uninterested in something that is not Alice, but when he puts on his gangnage signature while cooking, his personality becomes more aggressive as if he was possessed by a different entity. his seemingly crazy and assertive attitude when cooking earned him the alias "Mad Dog". along with Alice, she was expelled during the uruguayment exams. placed the second behind akira in the autumn election and shared the place with soma. ryo as a child was the head chef of a famous pub located in a port city in danimarca. because of this, he learned the art of seafood with inclination towards crustaceans and crustaceans. 4th seat: akira hayama originally, akira was already part of elite 10 as the 9th member sitting. after therunors, isshiki and tosuke were driven out of the council, akira joined the battle for the three vacancies and managed to sit. He did it for his precious person, jun.that was antagonized by the Azami administration. To keep his place he had to beat Soma during the advance exams, but eventually lost and was expelled. The expulsion was reversed when Central lost the rebels. Akira is known to be a master of spices. Its style of cuisine is concentrated on the aromatic aspect of the food it serves. It also keeps different spices to enrich the taste of the dish, as well as enhance its taste. His talent in spices is superb to the extent of the ability to name a spice only from his smell, and to name all the spices used in the food he tasted. He was the winner of the Autumn Elections, beating Soma and Ryo but forming a close bond between them. 3" Seat: Terunori Kuga Kuga is the president of the Chinese Cuisine Research Society, a school club Tootsuki that focuses on Chinese food research. It is the former 8th place of the Elite 10, but was driven out of the council after opposing Azami doctrines. He joined Soma and the company in the fight against Central, and was fortunately reintegrated into a higher position. As the president of Chinese cuisine RS, his cooking experience is in Chinese food, more specifically Sichuan cuisine. He is experienced in the use of spices and boasts of serving spicy food. Due to his talent in the kitchen, he has a reputation outside the Totsuki Academy, and also got his top sales stand during the Moon Banquet Festival. 2nd seat: Isshiki Satoshi My favorite character in the whole series. Together withand Tosuke, Isshiki was dismissed by his responsibility as the 7th seat of the Elite 10 after opposing Central. He joined the rebels and won against Elite 10 in the Regiment de Cuisine, and is now reintegrated as the Second Seat of the Council. Isshiki is an eccentric and generally peculiar man of the Polar Star Dormitory. He often appears naked with only one apron, or wearing only one undergrowth, shocking anyone who sees him. People in the dorm are no longer faded by its 'unique' fashion sense. He has an eccentric and eccentric personality, but he becomes serious for the good of his friends in the dorm. As heir of the famous Satoshi family, its fort in the kitchen is in the traditional Japanese cuisine. During the Regiment de Cuisine he presented his cooking talent and obtained the approval of the representatives of the World Gourmet Organization, dubbing his food as "jumpy aggressive Japanese cuisine". 1st Seat: Soma Yukihira He was his father's assistant chef. Joichiro, in their family restaurant in the "Yukihara Diner" center. Since his childhood he has grown in the experience of cooking and serving food to customers. He often wears the Yukihara Diner uniform and boasts of his family, its usual cooking style is "food that attracts everyone", embodied as " Yukihara style cooking". After his Stagiaire in Tokyo in Shino, he also gained expertise on French cuisine thanks to the guidance of Kojiro Shinomiya. However, his talent does notlimit to French food and diner-style, it is generally superb at any possible dish. Soma is very messed up and sometimes ignorant, but it is nothing but a beast in the kitchen. His cooking skills also gained the recognition of former conductor Senzaemon. He usually does some disgusting special dishes and makes them taste his peers, something he inherited from his father. He also has the talent to overcome any terrible situation with creativity and experience. You need to look for Erina and ask why she's not on the list, right? Well, this is simply because it is no longer an Elite 10 member. Director of the Totsuki Academy: Erina Nakiri Known as the "Tongue of God", Erina, at a young age, is the new director of the Totsuki Academy. She, along with Soma, managed to defeat Eishi and Rindo in the last episode of the Regiment de Cuisine. Now it is the highest ranking entity in the whole academy. As a child he was free, and his childhood was antagonized by his father, Azami Nakiri. Due to his improper treatment of his son, Senzaemon Nakiri exiled Azami and was denied his rights to the Nakiri family. However, the Azami terror still gae Erina remains. When Azami returned to grasp the Totsuki Academy in his hands, Erina was one of the most important figures in stopping the central administration. It has not been known since now, but Erina has had a change of heart and personality when she became a resident of Polar Star Dormitory. The generation of Soma isthe "Generation of Prodigies", even the generation of isshiki is nothing to look at, together, those eleven students of the totsuki teahouse culinary academy are bringing the school to advance and reach higher heights. Soma finally reached her goal of being the one on top of totsuki, but how her brother enters the scene, how will things change for him? a special thanks to shokugeki no soma wikia for the pictures! pictures! elite blog academy negative reviews
