How to draw realistic male hair with pencil step by step

Dandee Entertainment | Learn to draw the pen & ink drawings tutorial | How to draw the hair The hair is very difficult to draw, because what we see is different from what we know. You can not simply draw all the hair in the form of lines, because it is not what we see when we look at the hair. What we see must be simplified to lines and shadows, and there are many ways to do so. In this tutorial, I will show you one of these ways, a simple method that is great for rendering and quick sketches. I will present this method on four examples: long and straight hair, short hair, wavy hair and afro-textile hair. Before you start To follow this tutorial, you will need a kind of head base. You can use mine, or create your own in some other style. This base will be good for both females and males Let's take a look at the real hair to prepare for this tutorial: Long and straight hair Short hair Corrugated hair Afro-textile hair 1. How to Draw Long. Step Capelli Rights 1 Start by adding a little volume around the head. Hair should not lie on the scalp! Add even more volume if you are going for the manga-likeStep 2 hair Draw the part in the chosen place. Step 3 Draw the profile of the hair around the face. Step 4 Draw the direction of the hair gently sliding down on the shoulders. Keep in mind that you are not drawing individual hair here, just their flow. Step 5 Like I said before, hair doesn't lie on the scalp. Show him up front. Step 6 The hair is grouped in locks, and it is what weCreate skewed edges of such wires. Step 7 Each thread can be divided into smaller threads. Step 8 The locks will also be partially visible at the top of the head. Step 9 Draw some threads on the side, too, to add a little texture. Do not draw them as simple straight lines, but rather as narrow Y forms (normal and flipped.) Step 10 Make your hair high along the separation. Step 11 Line the entire hair, following the rhythm of the locks. Do not press too hard—the hair is soft and should not have a hard profile. Step 12 Draw long lines along the wires. This will give the hair a little detail and add depth to the whole haircut. Don't press too strong and don't tighten the lines too much. Step 13 Shade your hair now, thinking in terms of threads, not single hair. Step 14 Add some stray hair here and there to make it look more realistic. 2. How to draw short hair Step 1 Once again, draw a little volume around the head. In this case it will also be the profile of the entire haircut. Step 2 Draw the separation and the fringe that goes directly from it. Step 3 Make the full general profile by drawing the line of hair next to the ear. Step 4 Draw the direction of the hair, creating the 3D shape of the haircut. Step 5 Some stray wires may appear in the fringe. Draw their edge. ... and then their form going towards separation. Step 6 Define the threads on the sides of the head. Step 7 Draw some shadows between the wires in the middle as well. Step 8 Gently draw hair without drawing lines thattoo thick. all rows should be tapered. step 9 gently remove the threads. Step 10 you can add some stray hair to make it more natural. 3. how to draw the wavy hair phase 1 draws the volume of the hair around the head. Corrugated hair is often quite full and high. Step 2 draw separation. Step 3 draw the profile of the blows surrounding the face. Step 4 make your hair look high by filling the area between it and the scalp. Step 5 add sweet waves over the first lines of wire without touching them. Step 6 create more waves following the same pace. These waves should not touch each other. Step 7 close the shape of each thread reflecting its wave and adding a pointed tip. Step 8 draw some subtler tips on the bottom of the haircut. their curl should integrate the other waves. Step 9 draw the shape of the wires on the top of the head. step 10 draw the direction of the wires on the whole head. do it lightly. Step 11 each thread must be divided into multiple wires to the tips. Step 12 make the threads at the top of the head more detailed. Step 13 reline the whole hair without making the waves too obviously separate. Step 14 reveals the threads and spaces between the waves. step 15 give a strong profile to the hair, keeping it soft. Step 16 add strange hair here and there. 4. how to draw the step of the afro-woven hair 1 draw the profile of the volume of the hair. This time it will have a lot of volume. step 2 afro-textile hair has a lot of curls and textures. sketch sketchof wires around the head. Step 3 sketch the curly profile of the entire haircut. Step 4 hair around the face will have the same shape. phase 5 gently draws the general direction of the hair. perspective is important here! Step 6 imagines that each line of direction is a branch of a tree. add the leaves. Step 7 add hair strands in the form of small springs around the head. This will create a nice uneven profile. Step 8 draw bigger curls within the profile, following the direction you set before. step 9 shade the hair in a very general way, only to show that it does not have a flat surface. step 10 peel the entire haircut, drawing curls around. this will create the texture pleasantly. step 11 shave haircut more clearly, drawing shadows between curls groups. Step 12 to make the hair cut less round, you can add thicker curls here and there (draw a spring, and then draw again.) great work! Now you know how to draw four different hairstyles. if you want to know more about creating hair in different techniques, try these tutorials as well: digital painting an introduction to paint realistic hair in adobe photoshop melody nieves portrait how to render short, detailed hair in adobe illustrator sharon Archer-Thomas textures how to draw fur monika zagrobelna animals how to create a soft, furry kitten in adobe illustrator sharon Archer-Thomas Archer-Thomas
