## Micro sociological theories pdf

This course is an introduction to the study of human social behavior, social groups, and society. The course emphasizes the basic concepts and theories found in the discipline of sociology. The course will compare and contrast different theories as well as look at different processes of socialization. The student will compare and contrast the basic assumptions found in functionalist theory, conflict theory, and symbolic interactionism theory. The student will critique the advantages and disadvantages inherent in the most prominent research design methods employed by sociologists. The student will explain the connection between culture and the process of socialization. The student will discriminate between social interaction and social structure. The student will assess the nature of the family as a social institution from the functionalist theoretical perspective, the conflict theoretical perspective, and the symbolic interactionist theoretical perspective. The student will explain the difference between primary groups and secondary groups. The student will assess important implications derived from social divisions based on race/ethnicity, social class, gender, and age. The student will explain how historic social upheavals have resulted in significant social change. Doane UniversityDebra SepichReceive an instructor-signed certificate with the institution's logo to verify your achievement and increase your job prospectsAdd the certificate to your CV or resume, or post it directly on LinkedInGive yourself an additional incentive to complete the courseedX, a non-profit, relies on verified certificates to help fund free education for everyone globally This course is part of Global Freshman Academy (GFA), which means you can earn transferable ASU credit toward your college degree. Sociology is about people. Each individual is unique and idiosyncratic. Yet, when we come together for a common purpose, we try to conduct ourselves in a manner that will achieve mutually desired outcomes. Sometimes we manage to achieve this; sometimes we don't. Sociology is about that process. By understanding sociology and how we interact with each other, you can yield more personal and professional success. In this sociology course, you will learn about the social processes groups of all sizes follow to form, function and evolve over time. You will also learn about the ongoing dynamic individuals actively create in their social environment and how they are shaped by it. This course provides an understanding of how the formation and longevity of a society is possible when its members are diverse in their values, beliefs, preferences and agendas. You will learn about group dynamics, skills for effective interaction in groups and organizations, and obtain a deeper understanding of how sociology applies to everyday life and current events. Topics include: Society Culture Socialization Stratification and Inequality Gender Roles Major Social Institutions in the U.S. Including the Family, Government and Education System Deviance and Social Control Social Problems and Social Change Basic sociological theories and concepts How sociology applies to everyday life and current events Enhance your critical thinking and writing skills Become more knowledgeable about and accepting of people who look different than you and have differing beliefs, opinions and perspectives Improve your professional and personal communication skills Become eligible for academic credit and highlight your new skills and knowledge with a verified certificate. Use this valuable credential to qualify for academic credit, advance your career, or strengthen your school applications.Receive academic credit after successfully completing the courseReceive an instructor-signed certificate with the institution's logoAdd the certificate to your CV or resume, or post it directly on LinkedIn Sociology is important because it helps in solving social and international problems, gives better perspective into crime, helps in the study of institutional roles and in the understanding and planning of society. Sociology is basically defined as a study of individuals in relation to their society. Sociology is an important study as it helps human beings study the behaviors of individuals and come up with ways of improving life. Below are some specific details regarding the importance of sociology.Crime perspectives:It is through sociology that governments throughout the world are embracing the use of rehabilitation techniques to help offenders rather than meting punishment on them.International problems:Sociology helps in understanding different world cultures and in so doing bridges certain gaps that may otherwise cause conflicts. Through sociology, international wars and rivalries have been brought into manageable limits.Understanding and planning society:Sociology studies human beings from the basic unit which is a family to a global outlook. This helps in understanding intricate details about each type of society. The knowledge is then used in planning various issues that guarantee equality to all.Enlightenment:Sociology teaches human beings to be open minded in order to learn from other cultures' mistakes and strengths. macro and micro sociological theories. examples of micro sociological theories. types of micro sociological theories. micro and macro sociological theories pdf. what is micro theory in sociology. list of micro sociological theories
