Alimak hoist pdf

Alimak launched the new LSH hoist, designed for use inside lifting trees during building construction. The company has stated that the addition of an additional lift inside the elevator shaft of a building is an efficient vertical access solution, ideal for transporting workers and materials when the outdoor space is limited or when additional capacity is required. It has an internal dimension of 1.8 x 1.5m x 2.8m high with a load capacity of 2,000 kg. The new construction hoist can be installed inside the tree using a tower crane in half the time of a traction pass. The Alimak LSH can serve the top level of the yard as it uses rack and pinion technology, denying the need for a machine room or heavy steel beams for fixing suspension wires at the top of a site. Before disassembled, the construction hoist can also be used for installation of elevator guides inside the shaft. If the shaft is still open on top, the Alimak LSH can be disassembled from the tower crane, but the bolt design of the hoist allows to disassemble and remove easily if the shaft is already closed. "With safety guides and protection against fall on the roof of the Alimak LSH and without the need for a counterweight, the construction hoist provides for greater safety and simple installation, jumping and disassembling," said Alimak. Alimak LSH is equipped with a large screen control panel, with 7in touchscreen protective glass and IP54 inlet protection to provide in real timeinformation. Home Products List Construction Since the introduction of the world's first rack and pinion elevator more than 70 years ago, Alimak has continued to advance into vertical access solutions for shipyards around the world, through a range of applications, including construction, renovation and maintenance projects at high speed and low speed. The Alimak construction hoists are built on proven and proven technologies to promote sustainability, efficiency and improve productivity in the construction industry. Thanks to a series of smart features and robust modular design, Alimak construction hoists improve safety and provide an efficient and reliable vertical transport medium in all yards. The Alimak Quotes building blocks offer a diverse range of capacity, including various car size, load capacity, lifting heights and speed for efficient vertical passenger, freight and materials transportation. Reliable vertical access High productivity Superior driving comfort Modular design Need help to select the right product for next project? Contact our product experts to get information about the range of available vertical access solutions and a quotation to meet the needs of your project. Request a Present Quote on six continents, Alimak uses a global network to provide vertical access solutions for a wide range of applications on construction sites and industry aroundGet in touch to find a local representative of Alimak's global network. Search Directory Capital Hoist Hire and Sales stock a wide range of high-quality lifting gears and access machinery suitable for large and small construction projects. All our machines are of the highest quality and strictly controlled before use. NoticeSinun on kirjauduttava sisään, jotta voit jatkaa. Manufacturer of a wide range of products including Alimak Hek Hoist, Alimak Hek SC 65/32 Hoist, Alimak Hek SC45/30 Hoist and Alimak Hek SC65 Hoist. Interested in this product? Alimak SC 45: These units are built on a shaft of 450x450 (mm) dimensions for a maximum load of 2000Kg on each cage for a maximum lifting height of 150M. The VFD driving hoist has a variable speed of 0-54m/min while the DOL (direct online) has a constant speed of 36m/min. Complete details interested in this product? Alimak SC 65/32 - built on 650X650 tree sections & designed with unique features to reach 300M lifting heights with 2000Kg payload, available in 3 options of DOL, Frequency Control (FC) & FC-HS for high speeds to reach up to 0-90m/min. Complete details interested in this product? Alimak SC 45/30 - Built on 450X450 tree sections, with a 200Kg load and designed with unique features to reach 180M lifting heights, available in 2 options of DOL & Frequency Control (FC). Complete details interested in this product? Alimak SC 65 - These units are built on 650x650 (mm) shaft size for a maximumof 3200 Kg on each cage for a maximum lifting height of 200M. The VFD control hoist has a variable speed of 38-65m/min while the DOL (direct online) has a constant speed of 36m/min. See all details are an effective means of transporting workers and materials to your project quickly and safely. Depending on the chosen model, the personnel, tools and other materials can be used up to 7,000 pounds per car, including material up to 12 feet long. Morrow construction hoists provide performance, durability and lifting capacity with low energy consumption and reduced operating costs.
