Just cause reasons for termination

Ending a contractual agreement can be tricky, especially if the other party doesn't want to let you out. Although there may not be a difference between fired and terminated, there is a difference between terminating and discharging other types of contracts. If you file for bankruptcy, you'll also see the two terms used, which makes sense considering a bankruptcy releases someone from an obligation - in this case, debts. When times get tough, some may find they can no longer pay their debts. If that happens, one option is to file for bankruptcy, which can either relieve you of all of your debts completely or set up a plan to help you repay them. Once your bankruptcy is granted, the court will need to rule to discharge your debts, which frees you from having to pay them. Once a discharge has been granted, the creditor can no longer take action to collect the debt. A bankruptcy termination is a completely different matter. When a bankruptcy filing is terminated, it is effectively dismissed, which means the bankruptcy process ends. The termination can be ordered by the judge due to debtor misconduct or can be requested by the debtor herself if she changes her mind about filing. Just as a discharge means you're freed from your debts, a person who is fired is discharged from a job. Unlike bankruptcy, though, there's no difference between being discharged and terminated. It's the same as the difference between fired and terminated - in that there is no difference. The three words can be used interchangeably, depending on how intimidating you want to sound. However, some businesses do use the term "terminated without prejudice," which means the employee is eligible for rehire at a later date. This type of termination generally occurs if an employee was terminated for reasons unrelated to work performance. The person might, for instance, have been a diligent worker but the position was a poor fit. It's also important to distinguish between discharge and dismissal in terms of general contracts. If you have a contract in place, it likely has terms associated with it. If you're a business working on a project for a client, the contract may outline the items to be completed before the contractual obligations have been reached. Once you've fulfilled your obligations, the contract can be discharged, which means the project was finished as agreed. If a contract was terminated, though, it indicates something else entirely. Although a contract could technically be terminated upon completion, chances are it's terminated due to a disagreement or a decision that it simply isn't going to work out as planned. This can be a much less agreeable reason for the end of a contract than a polite discharge. Employment Discrimination If you have been terminated from a job because of diabetes —or even if you suspect but aren't sure that the reason was because of diabetes—it's important to understand your rights and the legal processes available to you to address the discrimination. Step One First, take a deep breath and allow yourself a few days to digest this change. You can also learn about diabetes discrimination by reviewing the information and materials on our website. Step Two Second, contact your state's unemployment office and sign up to receive unemployment benefits. Understand the unemployment benefits available to you in your state and what you need to do to receive them. Step Three Finally, know that you are not alone in this experience. Others have faced the same or similar situation and have prevailed against discrimination. To read the Association's clinical practice recommendation on employment of people with diabetes, see the position statement Diabetes and Employment. This image was lost some time after publication.If you work in Mac OS X's Terminal application often, consider replacing it with the free, full-featured iTerm.Term can open multiple tabbed terminal sessions in one window, and bookmark frequently used sessions. Color and label tabs based on task. Customize the window appearance with transparency, colors, fonts and background images. Free. Mac OS X only.iTerm [SourceForge] If the employee is laid off temporarily, you should keep the income withholding order. The amount of time that you must keep an IWO on files following a termination varies by state. Resources: An organization's private foundation status shall be involuntarily terminated if the IRS notifies the organization that because of willful, flagrant or repeated acts (or failures to act) or a willful and flagrant act (or failure to act), giving rise to liability for private foundation excise taxes, the organization is liable for the termination tax. Willful repeated acts (or failures to act) are at least two acts or failures to act which are voluntarily, consciously and intentionally committed. A willful and flagrant act (or failure to act) is an act which is voluntarily, consciously and knowingly committed in violation of the excise tax provisions, and which appears to a reasonable person to be a gross violation of these provisions. The act or failure to act may be attributed to the private foundation even though the tax is imposed on the foundation's managers rather than on the foundation itself. Furthermore, the failure to correct the act or acts (or failure or failures to act) that gave rise to excise tax liability may itself be considered a willful and flagrant act or failure to act. No motive to avoid legal restrictions or incur tax is necessary to make the act or failure to act willful. However, a foundation's act or failure to act is not willful if the foundation or its manager, if applicable, does not know that the act or failure to act is an act of self-dealing, a taxable expenditure, or otherwise gives rise to liability for excise taxes. Although the section 507(c) tax resulting from an involuntary termination may be abated, this is not true for any excise tax liability attributable to the acts or failures to act that caused the involuntary termination. Here are 10 of our favorites. Will your holiday plans take you through some of them? 2 of 11 1. Best for DJ Wannabes New York City's John F. Kennedy International Airport, T5Elevator music, be damned. JetBlue travelers can now use Rockbot in the airline's high-tech terminal to pick the songs that play over the loud speakers. You can visit the T5 monitor to check out upcoming tracks, real-time song requests and votes, and user photos, or just download the free app and hit play. Artists including CeeLo Green, The Wanted, Emeli Sande, Jason Derulo, and Daughtry have also played the terminal in JetBlue's Live From T5 concert series. 3 of 11 2. Best for Foodies Minneapolis-St. Paul International Airport, T1“My hometown has some of the best airport food in the country,” says Andrew Zimmern, host of Bizarre Foods America on The Travel Channel. If you have time to sit and slurp, he suggests Shoyu's pork ramen and platters of crab fried rice with XO sauce and a fried egg on top. Need food for the ride? Surdyk's Flights will send you off on your travels with terrines, cheeses, jamón Iberico and anything else you need for the flight. I always go for a prosciutto-and-mozzarella on a split pretzel that makes in-flight dining a pleasure. And Minni Bar makes a ham and pimiento cheese sandwich that is as good as they come.” 4 of 11 3. Best for the Hard-to-Impress Singapore's Changi Airport, T3It's difficult to pick the best terminal at this airport, which is part theme park, part spa, and part mall. But with a Balinese rooftop pool—\$13 and change nets you shower access, plus a free drink—and free movie theater screening blockbusters 24/7, T3 squeaks by as the best terminal for keeping busy professionals like Arabella Bowen, Editor in Chief of Fodor's Travel occupied. Still, whatever terminal you end up in, expect reclining chairs, recharging kiosks, and free Wi-Fi hotspots. And here's hoping for a long layover: If yours is longer than 5 hours, you can score a free, guided 2-hour tour of the surrounding city. 5 of 11 4. Best for Tree Huggers San Francisco International Airport, T2What would a visit to San Fran be without organic quinoa, reusable hydration stations, paperless ticketing, and the world's first airport yoga room? That's exactly what Gensler design firm was thinking when it renovated the joint and made it the nation's first terminal to earn an LEED Gold certification. No wonder Bowen calls it “the U.S.'s greenest terminal.” Plus, live music series and rotating museum exhibits offer plenty of opps to meet like-minded lassies. 6 of 11 5. Best for Cultural Connoisseurs London's Heathrow Airport, T5Besides boasting one of the best airport lounges in the world, T5 is home to more than the standard airport fare. Music agent Arash Shirazi recommends tasting Wagamama's East Asian cuisine and, of course Plane Food from U.K. native Gordon Ramsay. If you're lucky, professional musicians may even set your meal's mood. The London Philharmonic Orchestra has put on its far share of T5 concerts over the years. 7 of 11 6. Best for Stylemongers Los Angeles International Airport, TBITShopping in the City of Angels just became walkable. LAX's newly finished \$2 billion renovation bought the busy Tom Bradley International Terminal its own Westfield shopping district. The 32 retail locations include high-end labels Hugo Boss, Fred Segal, and Kitson LA. Fuel up for your search at Michael Voltaggio's ink.sack, Umami Burger, or Pink's Hot Dogs (an LA hot dog institution). Plot your route here. 8 of 11 7. Best for Gamblers Las Vegas McCarran Airport, T3Here's your last chance to win big. The airport's new terminal 3 is complete with 1.9 million square feet—many of which are dedicated to slot machines, according to Peter Greenberg, Travel Editor of CBS News, host of The Travel Detective, and author of The Best Places for Everything: The Ultimate Insider's Guide to the Greatest Experiences Around the World. It also boasts \$5 million worth of public artwork, including four replicas of the iconic “Welcome to Las Vegas” sign to help set the tone. Or you could blow through your winnings at the terminal's 10,000-square-foot duty-free store. 9 of 11 8. Best for Aspiring Chefs Dallas-Fort Worth International Airport, TDTerminal D houses a yoga studio, a free theater, and showers, but its most unique offering is its seamless integration with the Grand Hyatt DFW, says Greenberg. There, travelers on layover can watch award-winning chefs do their thing in the Epicurean Studio/Cooking School, which also offers classes quarterly. Watching all that food can work up an appetite, though, so the Grand Met restaurant also has the industry's first touch-screen virtual menu, complete with photos and ingredients listings. 10 of 11 9. Best for Yogis Chicago's O'Hare International Airport, T3 ChicagoOne of the country's most-stressed airports just loosened up big time by launching a yoga room in T3. Next to the terminal's indoor urban garden, the room is free for travelers, has a sustainable bamboo floor, floor-to-ceiling mirrors, exercise mats, and an area to store your carry-on luggage—and travel stress. Twenty minutes is all it takes to slash stressors and up your brainpower, according to research from the University of Illinois at Urbana-Champaign. And the room operates without a trainer—you never know which limber ladies will need help with their down dog. 11 of 11 10. Best for Locavores Seattle-Tacoma International Airport, Central TerminalDon't worry if rain delays hit while you're here, says Seattle local Harriet Baskas, author of Stuck At The Airport: The Very Best of Services, Dining, and Unexpected Attractions for Travelers. The airport, with plenty of views of the neighboring Mt. Rainier, is home to farm-to-table eats including Anthony's Homeport & Fish Bar. It's the highest grossing airport restaurant in North America. Ivar's is another local favorite famous for its fish and chips and clam chowder. Finish things off with a Washingtonian wine at Vino Volo. Bonus: “There's street-pricing in the shops and restaurants, which means prices—even on a cup of coffee—can't exceed what you'd pay at the same shop in town,” she says. (1) A device attached to the end-points of a bus network or daisy-chain. The purpose of the terminator is to absorb signals so that they do not reflect back down the line. Ethernet networks require a terminator at both ends of the bus, and SCSI chains require a single terminator at the end of the chain. (2) A character that indicates the end of a string. In the C programming language, the null character serves as a terminator.
