Citation counts are monthly source from Scopus and Web of Science® database quote. These databases contain quotes from different subsets of available publications and different time periods and therefore counting quotes from each is usually different. Some works are not in both databases and no count is displayed. Scopus includes quotes of articles published in 1996 onwards, and Web of Science® generally since 1980 onwards. Quote counts from the Google Scholar™ indexing service can be displayed in search of Google Scholar™ connected. Tell us about the wrong data How to use quotation counts More information Resistance connection at the moment View abstract cold-formed steel bolted moment connections. ultimate strength of bolted moment-connections between cold-formed steel members. stiffness prediction for bolted moment-connections between cold-formed steel members. behaviour of bolted cold-formed steel moment connections. types of bolted steel connections. types of bolted connections in steel structures
