We look forward to seeing how you use Hotpot technology. Upload an image. Try our AI photo recovery to remove scratches or imperfections. Try our AI Image Upscaler to increase image resolution. To get the best results, use black and white images without scratches or other hemorrhages that can confuse our very serious, but unfortunately limited,We are actively exploring methods to color images in a more accurate and realistic fashion. This Hotpot AI service analyzes black and white images and turns them into realistic color photos. To do this, we built the wonderful DeOldify project and the proprietary advancements applied based on the latest techniques of deep learning, a subfield of machine learning. The result is a sophisticated prediction on the colors of people and objects in a photo, but as any prediction, it could be wrong or biased. For example, our AI could color a blue shirt when it was actually red. For this service, images are not saved without user permission. For the storage and privacy costs of users, we only keep images as long as we need to perform our machine learning models, and do not store photos beyond this. Explore other Hotpot AI tools, including those for background removal, art customization, image upscaling, image restoration, outsourcing writing tasks, image coloring, and more. Helps improve our AI by sharing the images that convert badly.
